

MATTEO MARTINELLI

SOFTWARE ENGINEER

PROFILE

Hi! I'm Matteo, a freelance dev with strong mobile skills and a flair for the web. Autonomous, creative and results-driven, I combine technical expertise with an entrepreneurial mindset shaped by years of hands-on experience — from personal projects to business-oriented solutions. I'm looking for environments that value independence, real impact, and smart, human collaboration, where I can keep growing and contribute with a broad set of cross-functional skills. Check out tvoosai.dev for personal work and a deeper dive into my professional journey.

EDUCATION

Bachelor's Degree in Computer Science

2016-On going

University of Milan

Started in 2016, resumed in 2024 after work experience as a software developer. Studied databases, algorithms, OOP, functional programming, software engineering, web/mobile development, OS, network and cybersecurity.

High school diploma in Information Technology

2010-2015

I.T.I.S Cartesio - Cinisello Balsamo

Training in computer science, networks, and programming, where I first found my passion for development. That spark of curiosity became the engine driving my growth — turning ideas into code and challenges into opportunity.

WORK EXPERIENCE

Flutter Developer & Product designer

2024

Kurt

Brief collaboration with a startup focused on connecting amateur soccer players. Contributed to feature development and UX improvements based on user feedback. Designed an innovative voting system that is still in use today.

- Clean Architecture
- State Management (Bloc)
- Supabase (auth, db)
- Firebase
- Geolocation & Maps

Android/Flutter Developer & Scrum Member

2020-2024

DS Group / Enel

I worked on Android and Flutter B2B projects for Enel, gaining in-depth experience with low-level system components. I independently led the development of two major projects, managing the entire lifecycle from architecture to delivery.

- Camera API
- Content provider
- SQL-Lite
- Services
- Agile development with Scrum

Android Developer

2018-2020

DS Group / Poste Italiane

Worked on Android projects, collaborating with designers, backend developers, and analysts to deliver effective solutions. Gained experience in both legacy and modern development practices. Also handled testing activities to ensure application quality and stability.

- Legacy Android (Java, MVC/MVP)
- Android Jetpack (Kotlin, MVVM)
- Testing (JUnit, Mockito, Espresso)
- SQL-Lite & Room
- RxJava, LiveData, Retrofit
